PERSONAL SUMMARY

Computer Science (Multimedia Computing) undergraduate at the University of Malaya (CGPA: 3.84/4.00) with hands-on experience in software development through academic projects, hackathons, and technical teaching roles. Skilled in backend development, APIs, databases, and full-stack application workflows using Java, Python, JavaScript, Firebase, and SQL. Strong foundation in data structures, algorithms, and software engineering principles, with additional exposure to Generative AI, prompt engineering, and AI-assisted prototyping. Seeking internship opportunities in software engineering, backend development, technology consulting, or AI/automation from July/August 2026 to February 2027.

EDUCATION

University of Malaya **Oct 2024 - Feb 2028 (Expected Completion)**

Bachelor of Computer Science (Multimedia Computing), CGPA: 3.84/4.0

Perak Matriculation College (KMPk) **July 2023 - May 2024**

Physical Science, CGPA: 4.00, MUET: 4.0

SMJK Hua Lian **Jan 2018 - March 2023**

SPM: 11A (4A+, 6A, 1A-)

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, SQL

Web & Software Development: HTML, CSS, React.js, Android Development, Firebase, REST API Integration

Backend & Databases: **Firebase** Authentication, Firebase Realtime Database, SQL, Oracle Database, MongoDB, Database Design

AI, Automation & Data: Generative AI (ChatGPT, Gemini, Claude), Prompt Engineering, Google AI Studio, Machine Learning (Basic), Data Preprocessing, AI-assisted Prototyping

Emerging Technologies: Augmented Reality (AR Development), Basic Computer Vision

Tools & Platforms: Git, GitHub, VS Code, Android Studio

Soft Skills: Problem Solving, Teamwork, Communication, Critical Thinking, Adaptability

TECHNICAL COURSEWORK

Core Computer Science: Data Structures, Algorithms (Algorithm Design and Analysis), Object-Oriented Programming, Computer Systems and Organization, Computer Architecture, Operating Systems

Software Engineering & Development: Systems Analysis and Design, Web Programming, Mobile Application Development, Database Systems

Data & Artificial Intelligence: Machine Learning, Probability and Statistics

Computer Networks: Network Technology Foundations

Multimedia & Interactive Systems: Interactive Design, Multimedia Programming, Game Development

PROJECTS

FinPlan Web Application (Ongoing) | Full-Stack Web Development

Mar 2026 – Present

Leading the development of a personal financial planning web application as part of a semester project, focusing on backend logic, modular system architecture, and financial planning workflows. Collaborating on feature design and integration to support user goal tracking and decision-making processes.

EduMatch Mobile Application | Firebase, Android

Oct 2025 - Jan 2026

Led major development of a mobile application designed to match users with educational resources. Designed and implemented Firebase database structure, authentication system, and core functional modules while ensuring smooth system integration.

Mental Health Web Application | Firebase, Web, React.js

Oct 2025 - Jan 2026

Developed a web-based mental health platform as part of a team project. Implemented backend services using Firebase Authentication and Realtime Database and resolved integration issues to improve system reliability and user experience.

AR Batu Seremban Learning Application | AR, Google AI Studio

Oct 2025 - Jan 2026

Enhanced an AR-based interactive learning application by improving hand-tracking accuracy and motion interaction. Integrated additional features and optimized user experience using AR and AI-assisted tools.

Komuter Prediction Model | Machine Learning

March 2025 - June 2025

Supported data preprocessing and exploratory model development for commuter prediction analysis. Collaborated in understanding model behaviour, data handling, and predictive workflow processes.

Fish Eat Fish Game | JavaFX

Oct 2024 - Jan 2025

Independently developed a 2D game using JavaFX with real-time object movement, collision detection, and scoring system. Designed interactive UI and implemented smooth gameplay mechanics with optimized performance.

PROFESSIONAL EXPERIENCE

Data Structures Demonstrator (Java) | University of Malaya

March 2026 - June 2026

- Guided students in implementing data structures and algorithms including trees, sorting, and searching techniques
- Assisted debugging of Java-based programming and logical problem-solving tasks
- Supported technical lab sessions and explained algorithmic concepts clearly

Programming Demonstrator (Java) | University of Malaya

Oct 2025 - Jan 2026

- Explained programming fundamentals and object-oriented programming concepts
- Assisted students with debugging, logical thinking, and problem-solving approaches
- Facilitated hands-on programming lab activities

Teaching Assistant | Exin Tuition Centre

July 2024 - Sep 2024

- Provided academic support and one-to-one tutoring assistance
- Explained key concepts and improved student understanding
- Assisted classroom management and learning activities

ACTIVITIES / LEADERSHIP

Vice Head (Contest Protocol) | UM Hackathon 2026**Feb 2026 - June 2026**

- Coordinated competition flow and participant management
- Managed communication between judges and teams

Committee Member (Contest Protocol) | UM Technothon 2026**Feb 2026 - June 2026**

- Supported technical competition operations and logistics
- Ensured structured participant flow and event execution

Committee Member (Logistics & Technical) | UM Game Jam 2026**November 2025 - April 2026**

- Managed technical setup and event logistics
- Provided on-site technical support to participants

COMPETITIONS

2026

- Varsity Hackathon 2026 | Universiti Sains Malaysia — Participant (Fraud Shield)
- Deriv AI Hackathon — Finalist (Fraud Detection Figma)
- UMSPROUTS 6.0 — Participant (C.O.O.L UM)

2025

- i-UM Disrupt 2025 | Universiti Malaya — Special Mention Award (Ease & Access)
- UM Technothon 2025 | Universiti Malaya — Participant
- Programming League National 2025 | Universiti Malaya — Participant
- GDG Week Website Building Competition 2025 | Universiti Malaya — Participant (Ease & Access)
- NexG GodamLah 2.0 Smart ID Hackathon 2025 | Universiti Malaya — Participant (HealthLink)
